

# Building Rehabilitation

## “Edificio Sindicato Estibadores N°1”.

This involved improving and recovering a building of great historic value, located in the heart of the port’s neighborhood and accommodating Stevedore Trade Union No. 1, through a comprehensive repair of the roof, toilets, kitchen, floor, dining rooms and windows of this Heritage Building in Valparaíso. The works have been able to improve the conditions in which the building is used, and to support the protection of this valuable building, now used for social purposes, not only by trade union members but also by many of the town’s social and sports organizations.
