

“Young people entering the job market” project.

This initiative seeks to generate a welcoming space for Final Degree Students and Apprentices, addressed to young students in Technical/Professional Schools, Technical Training Centers and Universities, offering study programs related to the maritime port field. Its aims are to support the entry of young local residents into the job market and to encourage technical education in a practical manner, linked to the development of Chile’s most important port town.

STUDENT PRESENTATION DAY.

STUDENTS WEARING THEIR PERSONAL PROTECTION DEVICES (EPP).
